

Instructions for uprisings:

Dear patriots, friends and combatants, during our uprisings, we go to the streets to dictate our law, that of justice, freedom and human rights, not to listen or obey the anti-constitutional law of Biya, his regime, his stooges or his militia! We shall always be in a larger number than our adversary; thousands at one place, or tens, hundreds at different places at the same time, each group according to its size, means and capacities! We attack nobody, even not the police or BIR agents as long as they don't attack us in the first place; let's even be nice and welcoming to them! We attack no private property, only what belongs to or is under the direct authority of the dictatorial, criminal and assassin Biya's regime and its key figures! Like in Tunisia, Egypt and Libya, we do not let policemen or militia, who are stubborn to stay with the dying Biya's regime, and in fewer numbers than us, disperse us, dictate or tell us whatsoever! No, we are the masters of the field and of the streets; we are the princes(ses) of the nation; oh yes, we are the bosses who dictate the only right thing they have to do now: drop arms, bludgeons and other equipment and join the revolution! If they attack us with bludgeons and tear gas, we respond with sticks and stones! If they shoot at us with life fire, we respond with life fire, our patriotic heroes soldiers will come to our rescue at the right time! Let's complete the work well started! Let's accomplish our mission!

Peoples and Soldiers are ONE! Let's go together!
